

Your Name

Solutions Engineer · you@example.com · [github.com/yourusername](#) · [linkedin.com/in/yourusername](#)
· yourname.dev

Summary

EDIT ME: 2-3 lines. Years of experience, the kind of deals/customers/stack you work with, and what you're best known for (e.g. "owns technical discovery end-to-end," "known for fast POC turnaround"). This should match the framing on your About page.

Experience

Job Title — **Company** · City, Remote · *Month Year – Present*

- EDIT ME: Lead with the outcome, not the activity. "Built X that resulted in Y," not "Responsible for X."
- EDIT ME: Include at least one quantified result per role (deal size, win rate, time saved, # of POCs/demos run).
- EDIT ME: 3-5 bullets max per role. Cut anything that doesn't support an SE narrative.
